New Church Will Dedicate Next Sunday

On the last page of this issue of the Press will be found a cut of the new Methodist Church which will be dedicated next Sunday and also a program of the services for the entire day. Bishop Hughes and a number of the high church officials will be present besides former pastors and visitors. The old church, which was a two-story structure built nearly twenty years ago, was so badly damaged by the flood last spring that it was unsafe to use. The congregation decided to purchase a fine corner lot and erect a modern building.

"The old building was cut to one story, moved to the back of the new lot, repaired and fitted up for the Sunday school department, by the addition of library, class room and kitchen. In front of this a fine new auditorium was built, which will seat 250 people. Connected with it on the east side is a large room for primary class and ladies' parlor. There are sliding doors between this room and the auditorium and the main Sunday School room, so that the audience can be increased to 500. There is a choir loft large enough for a good sized organ and 20 singers. Back of the pulpit there is a music room and in the opposite corner is situated the pastor's study. The building was designed by Willson J. Wylie, architect, in the Gothic style, with the masses so arranged as to hide the old building as much as possible. The exterior is shingled with white cedar shingles. The interior has a wood paneled ceiling, supported by heavy timber trusses, which rest upon eight massive columns. The pulpit is in the northwest corner of the auditorium and so situated that the speaker will be in full view and easy hearing of those in the Sunday school room when the two rooms are thrown together. In the tower there is a class room and a room wired and equipped so that stereoptical and moving pictures may be shown in the auditorium."

Visited in Plumas County

E. E. Phelps and family spent the New Year holidays at Quincy, Plumas County, near where they formerly lived. They returned yesterday, excepting Mrs. Phelps who will return later. She has not been well for some time and the change to that climate seemed to greatly help her. Mr. Phelps says it was eight degrees below zero there but it did not seem as cold as it does here. On the trip home the train was delayed because of a great landslide on the Western Pacific road in the Feather River Canon, about 30 miles from Oroville. In front of their train was a freight, the engine of which was blocked in by immense boulders.

The Rochdale Company Will Move

That flood last year or something else of an unusual character seems to be stirring up business in a lively manner about Campbell. It is reported that the Rochdale Company will make the next moving. They will occupy the Sutter corner and carpenters will be put to work at once remodeling and fitting up the place for general store purposes. The residence just back of the store, belonging to Mrs. Sutter, has changed hands and will be occupied by J. E. Palmer's family. The restaurant and lodging house will probably be in new hands within a few days.

Mrs. S. G. Nelson has been enjoying a visit the last few days from her friend Mrs. M. Schlesinger-Thury, of Geneva, Switzerland.

State of Ohio, City of Toledo, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

Local and Personal

Don't overlook the damaged goods sale at Putnams.

Mrs. Cook of Harrison avenue has been ill this week.

Mrs. Wm. Beattie who has been quite ill for some time, is now improving.

Mrs. M. R. Farley is down from San Francisco visiting friends and relatives.

Mr. and Mrs. A. B. Chamberlin spent Sunday and Monday in San Francisco.

Mr. and Mrs. Merle Lloyd of San Francisco visited here over New Years.

We mean to close out Every Damaged Garment. Come and look them over. Putnams.

The W. C. T. U. will meet with Mrs. Gilman on Wednesday, January 10th at 2:30 o'clock.

Rev. Geo. Atkinson spent the first part of the week at Capitola on a visit with relatives.

Mr. and Mrs. J. B. Adams of Auburn, visited with Mrs. Sykes this week, returning home today.

Mr. and Mrs. Merle L. Lloyd of San Francisco spent Sunday and Monday with his parents here.

Let Golden West Cleaning and Dyeing Co. do your work for you. Putnams are their agents in Campbell.

LOST—A bunch of four brass keys on string. Finder will leave at the Press office and receive liberal reward.

Roosevelt Local of the Farmers' Union will install officers and give a program and banquet at Odd Fellow hall tonight.

W. R. Coupland and family are about to take possession of the fine new cottage just erected for them by Mr. Ainsley on his ranch on Hamilton avenue.

FOUND—A spotted pointer dog, with collar. Owner can have same by proving property and paying for this notice. Call on E. S. Brown, Rincon Avenue.

Mr. Harry N. Morrison of Oneida, New York and C. Wesley Lamb of Munsville, New York have been visiting their cousin, Mr. A. W. Adams, for the past week.

FOR SALE OR EXCHANGE—A good bakery business, worth \$4,000, daily receipts from \$50 to \$60. With all modern machinery. Will exchange for country property. Apply to G. G. NICOL.

Just think of getting a Boys shirt for 15c at Putnams.

Mr. and Mrs. S. G. Nelson have been in Berkeley and San Francisco the past week visiting with the former's brothers and sisters. On Thursday they celebrated their silver wedding anniversary in Berkeley.

The Rev. Geo. E. Atkinson was at Soquel several days this week, during which time he performed the ceremony which united his cousin, Mr. Charles H. Atkinson of Fresno in marriage to Miss Pearl Parrish of Soquel.

The front of Mrs. Downing's property, occupied by the Kelley & Weeks Market and the Beattie Bakery, is being given a coat of green paint with red trimmings. J. Berthoff is doing the work. As this spirit of improvement is of the "catching" kind, we would not be surprised to see some of the neighbors freshen up their store fronts a little. Some of them certainly need it.

Congregational Church

The Sermon Sunday morning will be a New Year's Message "Opportunities and Obligations," with a five minute New Year's talk to the boys and girls. C. E. topic "Courage," Marion Duncan, leader. There will be no evening service, as we unite with the M. E.'s in their special services at 7:30.

GEO. E. ATKINSON, Pastor.

Christian Science Services

In Odd Fellows' Hall every Sunday morning at 11 o'clock. Subject for January 7.—God. Sunday School at 12:15. The public is cordially invited.

New Year Dinner Party

Mr. and Mrs. Harry Richmond, of Virginia avenue, gave a New Year dinner party last Monday to which they invited the new families of that community. There were thirty-three who gathered at the table, including the families of the following: Walter Huntley, Mr. Burke, M. E. Mumma, S. A. Black, A. A. Purmort, H. C. Schnackenberg, J. C. Gordon, Harry Richmond, and a sister of Mrs. Mumma from San Jose. Dinner was served at one o'clock. Mr. Gordon took a picture of the company.

New Year's Dinner

The ladies of the W. C. T. U. served a cafeteria dinner at the Coffee Club last Monday. Chicken pie and oysters with all the accessories were prepared in splendid style and a good crowd—considering the unfavorable weather—was in attendance.

Farm Bookkeeping

Begin the new year by keeping an exact account of all your business transactions on the ranch. The Press office has a book ruled, printed and arranged for eight years' work. Come in and see it.

Good Fleece Lined Shirts and Drawers, for only 25c each. Just what you want for these Cold Days.

The Question of Glasses

Are they needed or not?
The question is easily answered by those who can't see well without them but for a great many who see well and still suffer from the effect of eye-strain it can only be decided after a careful examination. Such an examination I am prepared to give you, and an honest opinion as to what is needed. No operation. No drugs. No glasses unless necessary.

DICK & CHAMBERLIN

Campbell - - - California

DICKENS' OWN PEN PICTURE

Great English Novelist Wrote Humorously of the Details of His Daily Life.

For fourteen years Dickens made Broadstairs his principal summer home in England. London alone held a superior place in his affections. He felt his powers at their amplest when he was at the little channel coast town. Dickens has given the best picture of himself at his summer routine in Broadstairs: "In a bay window in a one-pair sits, from 9 o'clock to 1, a gentleman with rather long hair and no neckcloth, who writes and grins, as if he thought he were very funny indeed. At 1 he disappears, presently emerges from a bathing machine, and may be seen, a kind of salmon colored porpoise, splashing about in the ocean.

"After that he may be viewed in another bay window on the ground floor, eating a strong lunch; and after that, walking a dozen miles or so, or lying on his back in the sand reading a book. Nobody bothers him unless they know he is disposed to be talked to; and I am told he is very comfortable, indeed. He's as brown as a berry, and they do say is a small fortune to the innkeeper who sells beer and cold punch. But this is mere rumor.

"Sometimes he goes up to London (eighty miles or so away), and then, I'm told, there is a sound in Lincoln's Inn Fields at night as of men laughing, together with a clinking of knives and forks and wine glasses."

Woes of the Rich.

A smile illumined the countenance of the head bookkeeper. "The rich have their troubles," he said jocosely. "Yesterday the old man told me to come up to his house after hours to go over some accounts with him. When I arrived, about 7 o'clock, he had on his evening clothes and was going to the theater, he told me. He had an early dinner so as to work with me until his wife should return from an automobile drive up in the Catskills, where she had been all day. He was expecting her any minute, he said, and meantime we would go over the accounts. He had bought the tickets, of course. We went to work comfortably enough, but after a while the old man began to get nervous. Eight o'clock came, and 8:30, and still no wife. The old boy swore and I had to try to look sympathetic. At 9 o'clock he received a telephone message that wife's party was up in the Croton watershed with six punctures and might never get home. The old man wasn't fit to work any more that evening."

Wall Colors and Light.

In painting or papering the walls of a room the question often arises what color reflects the most and what the least light? Recent experiments in Germany gave the following results: Dark blue reflects 6 1/2 per cent. of the light falling upon it; dark green, about 10 per cent.; pale red, a little more than 10 per cent.; dark yellow, 20 per cent.; pale blue, 30 per cent.; pale yellow, 40 per cent.; pale green, 46 1/2 per cent.; pale orange, nearly 55 per cent.; pale white, 70 per cent. Glossiness and varnish increase the amount of light reflected.—Harper's Weekly

Business Methods in Charity.

Charitable associations in Frankfurt, Germany, operate lodging houses, restaurants, eating rooms, canteens for the benefit of the poor, says the Pittsburg Dispatch. They are conducted on strictly business methods. Dinner—soup, meat, vegetables—is provided for a fraction more than eight cents. Until the recent increase in prices for foodstuffs the meal was given for less than eight cents. Lodging is provided at from thirty-eight to sixty cents a week.

Glad to Be Himself.

Humperdinck does not take himself seriously at all; his humor is mainly leveled at himself. To the question, "Did you always wish to be a composer?" he retorted quickly: "Yes. At first I thought I should be a second Beethoven; presently I found that to be another Schubert would be good; later, I would have been content to be a Lortzing—then gradually satisfied with less and less I was resigned to be a Humperdinck.—Ainslee's Magazine

Cast-Off Uniforms in Demand.

Much money is made out of cast-off police uniforms. Quantities are bought by African traders and exported to various parts of the "dark continent," where they are exchanged for palm-oil, ivory, skins and other merchandise. It is by no means an uncommon sight to see a swarthy savage dressed in the uniform of a London policeman, and wearing the regulation helmet of the force.—London Mail

How He Did It.

"Arry: D'fear 'ow I done that swany kipper down a bit uv an argument up the Crown? Y'see, 'e mos stickin' up for them dirty foreigners' ideas o' fair, an' just as 'e's in the middle uv it I shouts out, 'Look at yer beer.' 'Course, round goes 'is 'ead, then I fetches 'im such a biff over the ear-les. 'Eavens! I could 'ear the blessed barful fairly roarin' as I 'opped round the corner.—The Sketch.

THE PROGRESS OF MAN.

The whole progress of the human race has indeed been due to individual members discovering means of concentrating energy and of transforming one form into another, says Sir William Ramsey. The carnivorous animals strike with their paws and crush with their teeth; the first man who aided his arm with a stick in striking a blow discovered how to concentrate his small supply of kinetic energy; the first man who used a spear found that its sharp point in motion represented still more concentrated form.

The preparation of oxygen by Priestley applied energy to oxide of mercury in the form of heat; Davy improved on this when he concentrated electrical energy into the tip of a thin wire by aid of a powerful battery and isolated potassium and sodium.

COOPS IN FIELDS FOR BABIES.

That necessity is the mother of invention is shown by the hundreds of little buildings resembling chicken coops which one may see scattered over the wheat fields of Russia to provide day-time homes for the babies of the Russians who work in the wheat fields. The Russian mothers are obliged to take their babies to the fields, and have built these little structures of wood, covering them with canvas. At noon and once in the morning and in the afternoon the mothers visit their children, leaving them alone for the remainder of the day. The youngsters are apparently contented, and remain in their little coops without a cry, gazing through the slots at the passers-by.

MANUFACTURED MILK.

Cows are not numerous in Japan, but the Japanese are fond of milk, and to meet this demand in the face of a natural shortage they long ago put their wits to work and evolved a product that the average person cannot distinguish from the regular dairy article.

The artificial milk is derived from the soja bean. The beans are first soaked, then boiled in water. Presently the liquid turns white; sugar and phosphate of potash in proper quantities are added, and the boiling continued until a substance the thickness of molasses is obtained. This fluid corresponds very accurately with ordinary condensed milk, and when water is added cannot be told from fresh.

BAR TWENTY-SIX MILES LONG.

Inquiries were made of the auditor for Lewis county by the Oregon-Washington Railroad and Navigation company regarding the price of a license permitting it to sell liquor on its trains, and the question arose as to whether the railroad must take out a separate license for each train, or if one would be sufficient.

Auditor Swofford ruled that the railroad would be required to take out a license for a bar 26 miles long, that being the length of the company's line across the county. This would allow the railroad the right to sell liquor on any part of its right of way.—Centralia Letter to the St. Paul Pioneer Press.

AFRICAN PYGMIES.

The African pygmies are not creatures of fiction. They are small, but very real beings, as many travelers through the Congo forests can testify. These human dwarfs are about four feet in height (sometimes taller), and are generally understood to be exceedingly savage in disposition. What they don't know about woodcraft is not worth knowing, and to encounter them in the dark tropical woods is dangerous indeed. They live entirely by hunting, their homes being sometimes in the holes and caverns of the earth, and sometimes in the trees. They are evidently in the lowest human stage, about as near the animals as it is possible for human beings to be.

HUNTERS OF CLASSIC RENOWN

There were five great hunters of classic renown: Acastos and Meleager, who took prominent parts in the famous Calydonian hunt of the wild boar; Actaeon, the huntsman who was transformed by Diana into a stag as a punishment for intruding on the scene when the goddess was bathing; Adonis, beloved of Venus, who was killed by a wild boar while hunting; Orion, the great hunter, changed into the constellation, so conspicuous from November through the winter.

BIRDS IN ARCTIC REGION.

Birds go to the arctic regions to rear their young because of the lavish abundance of food provided there. Seed-eating birds find an abundant supply of cranberries, crowberries and other ground fruits which remain frozen all winter, while insect-eating birds have only to open their mouths to fill them with mosquitoes. The conditions in Siberia and Alaska are identical, the open season for birds being a period of four months' duration in each.

FOUND IN SHARK'S STOMACH.

A curious assortment of bric-a-brac was found in the stomach of a man-eating shark, 17 feet in length, caught at the mouth of Delaware bay by the crew of a United States government lightship. An invoice of the shark's interior furnishings includes one umbrella, one barrel stove, a quantity of steel and iron junk of different kinds and enough oil cloth to cover the floor of a good sized kitchen.

HORSES BRED BY THE ARABS

A HORSE AUCTION OUTSIDE MARAKESH

IN these days of the reign of petrol, there are those who are apt to forget that horses remain a necessity to the armies of the world. It is of interest to point out, therefore, how excellent a recruiting ground for cavalry horses might be found in Tripoli and Morocco.

"Every grain of barley given to a horse is registered in the register of 'Good Works,'" said Mohammed, and various passages in the Koran boken the prophet's deep appreciation of the value of horses to his people. We know with some degree of certainty that horses were ridden 1000 B. C., that chariots were in use probably 2,000 years previously. But it was left to the people of the prophet to forge the true connecting link in the chain between our modern Derby winner and the horses of the prime. All through the centuries the Arab helped on this ancient breed, increasing the speed, developing the stamina by means of careful selective mating, selling their stallions sometimes when the inducement was considered good enough, but always retaining the finest mares to carry on the priceless strain.

Happily we were able to take the Arab horse and his near relative, the Barb, and by their help to evolve a distinct breed which is superior to both parent stocks in size, strength, speed and perhaps in power of endurance. I refer, of course, to our thoroughbred horse. The assertion that the modern thoroughbred is superior to the modern Arab in the points just mentioned may not exactly coincide with opinions which imply that our studies in pedigree have been all a mistake, and that the two centuries devoted to painstaking breeding in England since Charles II. sent to the east for those royal mares which really laid the foundation of the British stud, have practically been wasted. Short distance racing, we are told, has brought about the alleged deterioration of the thoroughbred, and we are left to infer that in general excellence our present day racers are nothing like so good as the horses that sprang from the original Arabian stock.

The exportation of horses from Morocco is forbidden. At such an auction as that illustrated, the "lots" are taken round and round to possible purchasers, and are eventually taken back to the highest bidder, that he may be possessed of his property at once.

British Thoroughbred Horses. But there is no proof that our thoroughbreds have deteriorated at all; indeed, the opinion of the majority of those who have gone closely into the subject, from Admiral Rous' time down to the present, is to the effect that such modern champions as St. Simon, Flying Fox, Scepter and Isinglass have been as much in front of Eclipse, Childers and other giants of old as the latter were superior to the native English stock which flourished before the introduction of eastern blood.

True, the tendency of the turf of today is to produce sprinters, and not long distance horses. But races are run at top pace nowadays, and the race for a mile in 1911 probably calls for as great powers of endurance as the slower run four mile heats of 150 years ago. Is there an Arab which could have been matched against the White Knight over a four mile course? Is there an Arab which would outdistance the fine thoroughbred hunters which may be seen in the first flight when hounds are running with breast high scent over the grasslands of the shires? Is there an Arab capable of showing greater endurance than thoroughbreds such as Cloister, Manifesto, Asetic's Silver or Eremou, over a tremendous course like that of the Liverpool Grand National? I should

INJURIOUS FLAVORS IN MILK

One Kind Due to Feed Eaten by Cow and Second Largely Caused by Contamination.

(By B. F. KAUPP, Pathologist, Colorado Agricultural College.)

The abnormal or injurious flavors in milk are of two kinds; first, those due to feed eaten by the cow; second, those due to contamination.

The first kind is scientifically spoken of as feed flavors and is due to the cow eating large quantities of turnips, onions, ensilage, beets, ragweed, etc.

This ill flavor is due to volatile oils contained in the strongly flavored feeds. Such flavors leave the animal through the different secretions and excretions of the body.

When feeding is done immediately after milking, these feed flavors largely pass off through other channels, or secretions, than the milk and are not noticeable. It is also maintained that if some rough forage be fed along with such feeds that produce ill tastes in milk, it assists in obviating such flavors.

It is within the power of the dairyman to obviate the second, flavor of contamination. This class of ill flavor is largely due to contaminating bacteria. Of these there are many, each giving its peculiar flavor. Another contaminating flavor is due to the absorption of certain strong odors.

The cause of the contamination of milk is largely due to lack of perfect cleanliness with the milking utensils, surroundings, methods of delivery and personal cleanliness.

The udder and adjacent parts should be washed with clean water and wiped dry with a clean, dry towel. The hands and the clothing of the milkman should be clean. Bottles, buckets, etc., should be sterilized with live steam and turned upside down so as to prevent the collection of dust, which always contains germs and mold spores. Small top pails should be compulsory by law.

SILLO HAS MANY ADVANTAGES

Ensilage is Nearest and Most Economical Substitute for Pasture Grass, Ideal of Rations.

An Ohio farmer, who has used ensilage for a number of years, sums up the advantages which he gains, as follows:

"I would say that every stock farmer should have a silo for the following reasons:

"First—Because corn ensilage is the nearest and most economical substitute for pasture grass, which is the most ideal of all our rations.

"Second—That an acre of corn ensilage yields from 600 to 2,000 pounds more nutrients per acre than any other of the farm crops.

"Fourth—That its use makes it more pleasant to feed stock and also saves a great deal of time and labor.

"Fifth—Because with its use in the winter ration, larger gains and milk flow are the result.

"Sixth—With its use, practically the entire food value of the corn crop is saved.

"Seventh—That the silo enables the farmer to keep double the number of head of stock on the same farm.

"Eighth—That our fields are cleared and ready for fall wheat or rye, as all our corn stalks are safely stored in our silo instead of going to waste in the field.

"Ninth—And lastly and probably the most convincing of all, is the fact that practically every farmer now using the silo would not do without it. When we can grow and store away for winter use a food that takes the place of our pasture and that food can be raised on our farms at a less cost than any of our present feeds, the equipment for the storing of such feed should be installed on every stock and dairy farm."

Water Soaked Field.

A furrow plowed through a field that is soaked with water will aid and hurry the process of drying several days. On the bare spots scatter a generous quantity of grass seed, mow each lightly and go over the ground with a spiked-tooth harrow again. Frost throws grass roots out of the ground. Get out the roller and go over the fields before they are hard and dry.

Comfortable Winter Range.

Give the hens full range of the barn, stables and other farm buildings during the day, where they will have comfortable, dry shelter, and will be able to glean much feed that would otherwise go to waste. Confine them in their own house at night so they will not become a nuisance in the other buildings.

The Pure-Bred Sire.

Good sires are very essential it hogs of the highest quality are to be grown and a uniformly profitable herd built up. Only pure-bred boars should be kept, and these should be carefully selected to insure prepotency, quality, and soundness.

Plants for Window.

If your supply of window plants is not as large as you would like, search among the annuals in the beds and borders, and you will find tiny seedlings. Pot and put them in the window and they will soon bloom.

Care of Squash Seed.

Wash the seed of all squash, cucumber, etc., to remove the pulp and dry thoroughly before putting away. Otherwise they will mold; a condition which seriously impairs the germinating power.

CAP and BELLS

WANTED \$1,000 AS A STARTER

Coy Little Maiden After Waiting Two Months Was Willing to Compromise on \$235.

"Robert, dear," said the coy little maiden to her sweetheart, "I'm sure you love me. But give me some proof of it, darling. We can't marry on \$15 a week, you know."

"Well, what do you want me to do?" said he with a pained air.

"Why, save up \$1,000 and have it safe in the bank, and then I'll marry you."

About two months later she cuddled up close to him on the sofa one evening and said:

"Robert, love, have you saved that thousand yet?"

"Why no, my love," he replied, "not all of it."

"How much have you saved, darling?"

"Just \$235, dear."

"Oh, well," suggested the sweet young thing, as she snuggled a little closer, "don't let's wait any longer. I guess that'll do."—Lippincott's.

FAME.

"Mammy, why is I named Andrew Jackson?"

"Why, chile! Dat was yo' grandpap-py's name!"

Juvenile Logic.

Little Mabel's mother was expecting Mabel's auntie on a visit. Just as she was almost due to arrive a telegram came which read: "Missed train. Will start at same time tomorrow."

Mabel hurried home from school, expecting to greet her auntie, instead of which she was shown the telegram. She read it through carefully and laboriously and then she remarked:

"How silly of auntie, mamma!"

"Why, dear?" inquired the mother.

"Well, don't you see that if she starts at the same time tomorrow she will miss the train again."—Illustrated Bits.

His Idea.

She—Look here, John Foodies, why do you always get out of the way when the carpets need to be taken out and cleaned?

He—Merely, my dear, because of my desire for originality.

She—What do you mean by that fool talk?

He—You know, my dear, I always try to avoid the beaten path.

Real Class.

"You are not going to jilt the duke?"

"Yes; I think I'll marry an American."

"But think of the duke's fine old castle and his moated grange."

"All very well, but the other fellow owns a garage."

Always the Same.

Diogenes held up his lantern and gazed into the mirror.

"I have found at least one honest man," he said.

All of which goes to show that reformers of all ages are alike.

Little Things.

She—I've always said that it is the little things that trouble us most."

He—Yes, I know you have.

"And now here's a paper which says that the proboscis of a flea, with which he 'bites,' is 12 times thinner than the finest needle made."

Not Up to Date.

The Schoolmaster—Now, how was it that this great discovery made by Columbus was not fully appreciated until many years after his death?

The Up to Date Scholar—Because he didn't advertise, sir.—The Sketch.

Its Complement.

"Pa, why does the eye have lashes?"

"Because it has a pupil, my son."—Judge

Years of Suffering

Catarrh and Blood Disease—
Doctors Failed to Cure.

Miss Mabel F. Dawkins, 1214 Lafayette St., Fort Wayne, Ind., writes: "For three years I was troubled with catarrh and blood disease. I tried several doctors and a dozen different remedies, but none of them did me any good. A friend told me of Hood's Sarsaparilla. I took two bottles of this medicine and was as well and strong as ever. I feel like a different person and recommend Hood's to any one suffering from catarrh."

Get it today in usual liquid form or chocolate tablets called Sarsatabs.

Say a Kind Word.

Always say a kind word if you can, if only that it may come in, perhaps, with a singular opportuneness, entering some mournful man's darkened room like a beautiful firefly, whose happy convulsions he cannot but watch, forgetting his many troubles.—Arthur Helms.

MURINE EYE REMEDY.
For Red, Weak, Watery, Watery Eyes and Granulated Eyelids. Murine Doesn't Smart—Soothes Eye Pain. Druggists Sell Murine Eye Remedy, Liquid, 25c. 50c. \$1.00. Murine Eye Salve in Aseptic Tubes, 25c. \$1.00. Eye Drops and Eye Advice Free by Mail.

ISN'S

IS THE NAME OF THE BEST REMEDY FOR COUGHS & COLDS

aiding the stranded

GOOD WORK DONE BY AMERICAN SOCIETY OF LONDON.

It Assists Yearly a Thousand Fellow-Countrymen Who "Go Broke," Either by Sending Them Home or Lending Them Money.

The American Society of London helps upon an average a thousand stranded Americans in a season. So far this year, however, only 700 have been assisted, the New York Sun's correspondent says. The officials of the society attribute the falling off to the stories about high prices that preceded the coronation. The society, which has been in existence for 12 years, has paid the passage home of over 10,000 persons and has supported numbers in London until the arrival of funds.

Only five per cent. of the money expended has been returned. This, however, is not considered proof of a lack of gratitude on the part of the recipients, as a return is not expected of most of the beneficiaries. Of those who have been expected to repay 20 per cent. have kept their word. A considerable part of the efforts of the society is devoted to the assistance of American sailors. The home government through the consulates assists American sailors on American ships, but American ships are few and the number of stranded American sailors is considerable. The society is doing a work that many think belongs to the government.

Despite the supposed non-existence of a color prejudice in England, the society has the utmost difficulty in securing the return of American negroes to the United States. A white man can be assisted and can get a working passage to any part of the country, but only three ports, Newport, Cardiff and Swansea, are available for the sailing of negroes.

It is noticed this year that a number of husbands have deserted their wives in England, leaving them stranded. This contemptible method of getting a divorce on the ground of desertion has been nipped in the bud in a number of instances this year.

Twenty-five per cent. of the applicants for assistance are not Americans, but Englishmen who think the society an easy means of getting free passage to America.

The usual story is that the applicants are naturalized citizens, but they are never able to present their naturalization papers. In previous years school teachers have made up a considerable percentage of the applicants, but with the development of personally conducted tours with all charges included, there is now scarcely a case a year. Only one-third of the sum expended is contributed by members of the American society. The burden falls, with a few exceptions, upon the Americans who reside in London.

F. C. Vanduzer, the honorary secretary, says that he could save American visitors many dollars if they ignored casual appeals and referred persons seeking aid to the society for investigation. For instance, this week a prominent American woman forwarded to the society a letter appealing for help. An investigation proved that the applicant for assistance was not an American but an Englishman who had been living for three years upon money obtained from easy going Americans who had been "falling" for his tale of hard luck.

If you use Eye Salve use the best. PETTIT'S EYE SALVE is the standard, is reliable and costs no more than inferior goods that are unknown. Used by Physicians and Oculists, helps where all others fail. It is not the TUBE or BOX that cures, it is the SALVE that does the work. Guaranteed by Howard Bros. under the Government Food and Drugs Act. Don't be deceived or misled. The only really antiseptic Eye Salve that has been in the market for years. Sold by Druggists throughout the known world.

Aeroplane and Mythology.
Hindu belief and lore alike strongly hold that aerial navigation is not the new thing that it is claimed to be in Europe. It is said that aeroplanes of some sort or other were the conveyances ordinarily used by the Devas (heavenly beings) of Hindu mythology.

SAN FRANCISCO, Dec. 31.—The Penmanship Number of "The Herald," published by Heald's Business Colleges, has just come from the press. This paper is sent to young people all over the Pacific Coast who are interested in Practical Education. The last edition is particularly attractive, as it shows a variety of penmanship reproduced from originals executed by the different penmen of the Heald Schools. These colleges employ more than a dozen of the most skillful penmen in America, thus ensuring to their students first-class instruction in the art of handwriting.

Foxes Bred for Their Coats.
Blue Arctic foxes are bred extensively on the islands of the Alaska coast. These creatures cannot be tamed, but they are fed all the year round and trapped in special houses in the winter when their coats are in suitable condition.

How giddy a man feels when he hears of a baby being named after him.

Trinity of Pleasure.
Reason's whole pleasure lies in these words: health, peace and competence.—Pode.

Keep busy and you'll have no time to be miserable.

Winter Months on the Farm

How to Improve Them

Winter Care of Machinery

How to Store Farm Implements to Prevent Rust and Rot and to Get Greatest Service
By PROF. C. A. OCOCK
Wisconsin College of Agriculture

Copyright, 1912, by Western Newspaper Union

Over \$100,000,000 is expended annually in the United States for farm machinery. The average American farmer exhibits progressiveness in his adoption to and ready purchase of improved machinery, but woefully falls by the wayside in his care of this same machinery. A short trip into even the best farming districts will show barnyards dotted with valuable machines which have absolutely no protection from storms and weathering. The farmer houses his stock, crabs his corn, fills his silo and granaries and protects these from the elements, but shortsightedly leaves his grain binder, cultivator, plow, drill and the rest of his machinery exposed to all kinds of weather.

Exposure Worse Than Wear.

If these same farmers will stop to consider that by their own shiftlessness, they are shortening the life of this machinery from 60 to 80 per cent., the need of better methods will be self-evident. To a certain extent they are aiding in the ultimate wreckage of their machinery just as though they gradually smashed it to pieces with a sledge hammer. There is no need to ask for the solution of this question, it is so simple. Some \$200 or \$300 expended in a machine shed would pay for itself in two years due to the prevention of a depreciation in value of the machines through exposure. Practical experience has shown that while machinery without shelter lasts only five years, that the same machines well housed and protected remain in good servicable condition for over 12 years. A machine shed returns at least 30 per cent. on the original investment. It increases the life of the machinery from 50 to 100 per cent.

Furthermore, the improved appearance of the barnyard argues in favor of the storage of machinery. The prospective buyer or real estate agent always notes unstored machinery scattered about the yard and accordingly values the farm at a lower price, due to its unfavorable external appearance.

Farm Tool Shed.

An excellent machine shed, with a farm shop in one end readily accessible for repairs, should be about 24 by 60 feet. The shed should be provided with sufficient sliding doors so that the various implements can be taken out and returned with greater saving of time and labor. The building should face the south so that the doors will not be exposed to beating, driving storms from the north or to the accumulation of snow and ice. Such a shed and shop provided with a concrete foundation would cost approximately \$350. Considering the prolonged life and value of the machinery, due to storage the cost of the building would average about \$20 a year.

The farmer, well provided with a suitable shop and machine shed, can employ his spare time very efficiently during the winter in repairing and caring for his machinery.

One ironclad rule should be rigidly

enforced on the farm, and that is that every implement or machine should be returned to its place in the machine shed immediately after it has been used. Then one knows the location of the machine and its condition, when it is again required for use. It takes but little extra time to return tools to the shed when the team is hitched to them in the field.

Cleaning and Oiling Machines.
All the machines should be overhauled and thoroughly cleaned before storing them for the winter. Broken parts should be ordered and repairs ordered so as to allow plenty of time for their shipment. All bolts should be tightened up, bearings saturated with lubricating oil, and wearing surfaces should be coated with a good quality of hard oil to prevent rusting. The binder attachment of the grain binder and the mower mechanism should be taken apart and thoroughly cleaned. All the old gummy oil should be removed; some of the more delicate parts of the machine should be cleaned in kerosene. There are examples of grain binders well cared for and intelligently used which have been worked 30 years.

The cultivator plows, common plow shares, and harrow teeth should be sharpened during the period of slack work in the winter. New hay rake teeth, sickle sections, and other broken or ready to break parts should be replaced wherever necessary. The manure spreader is usually in use dur-

ing the winter months and should be carefully looked after. The spreader should be cleaned out after being used, or some of the soft manure will freeze in the box drum and a breakdown may result.

An occasional coat of paint is another great preservative which considerably lengthens the serviceable use of the farm machines. A small stove can be installed in the workshop during cold weather and the various implements can be painted in the shop with good results.

Special attention should be paid to the same and storage of farm steam engines during cold weather.

No oil or grease should be left in the cups to congeal or harden. Resting in the stuffing boxes should be prevented by cleaning out and replacing the old packing. On large engines the scale should be removed from the interior of the boiler while the exterior should receive a coat of asphalt paint. During the cold months never leave water overnight in boiler or water jacket of the engine, or it will freeze and probably burst these parts.

Winter Care of Gasoline Engine.

The inexperienced operator meets with many difficulties in handling gasoline engines during severe winter weather. The first essential of the gasoline equipment, year in and year out, is a good, strong, concrete foundation. Where use of concrete is impossible, the engine should be securely bolted to heavy timbers fastened to the floor. They should be of sufficient size to absorb all violent vibration. A secure foundation increases the floor bearing of the engine and secures greater rigidity.

The engine should never be run faster than its specified speed, as otherwise the operator is merely wasting the power of the machine without obtaining the most efficient results. Care should also be exercised in belting the engine to a piece of machinery to use the correct size pulleys, so otherwise energy which the engine generates will be wasted.

In starting a new engine the valves are sometimes gummed to such an extent that they will not entirely close. This reduces the amount of the compression of the engine. In other instances the valves stick so that the compression is wholly lost. The remedy is to squirt a little gasoline or kerosene on the valve stems and clean off the sticky oil. Compression is also lost due to a lack of lubricating oil on the piston and cylinder walls.

To correct this difficulty the operator should turn the flywheel over until the piston is drawn out of the cylinder and then cover the projecting portion with a liberal coating of lubricating oil. The oil will act as a seal.

In general the operator should use judgment and common sense as regards the amount of work an engine should do. One cannot abuse a gas engine without disastrous results. Good lubricating oil should be used in the engine, and care should be observed to see that the oil cups are kept free and

Practical farm machine shed.

that the oil is not restricted in its passage from the cup to the cylinder. Another great difficulty is the starting of engines during cold weather. Water-cooled engines can be more easily started by closing the drain in the bottom of the cooling jacket and pouring in about two pails of warm water. The last pail of water should be very warm but not to the boiling point, as radically sudden expansion might result in cracking the cylinder. The increased warmth of the cylinder will result in a quick ignition of the charge.

Another simple plan used in case of either air or water-cooled engines is to open the intake or exhaust valve and then inject a small amount of gasoline into the cylinder. Allow the engine to stand for a few minutes so that the gasoline may evaporate, then crank it and it will usually start on the first trial.

Strangles in Horses.

An epidemic of strangles is always a source of alarm to horse owners, as this disease is most insidious in its attack and usually leaves its victims in such a debilitated condition that they are incapacitated for work for weeks.

Hothouse Hogs.

The hothouse hog schemes hatched by experienced city farmers lately are more likely to bring them valuable experience than great riches.

HIS PHENOMENAL GIRL

SHE UNDOUBTEDLY WAS ONE OF THE SMARTEST EVER.

But Somehow the Father Failed Miserably in His Attempt to Convince the Man With the Square Jaw About Her.

A man with a Muttandjeff face and watery blue eyes boarded a car the other morning along with a tall man with a wide jaw and square-toed shoes.

"Well, sir," said the man with the Muttandjeff face as soon as they were seated, "that little girl of mine is certainly the greatest!"

"For my part," interrupted the firm-jawed man, "I think about half the members of congress could be arrested for taking money under false pretenses. They don't do a lick of work—just show up often enough to draw their pay. It's an outrage."

The man with the comic-picture countenance looked puzzled.

"I guess you didn't quite understand me," he said after a brief pause. "I was going to tell you a funny thing that little girl of mine said this—"

"Blamed if there ain't another tree that was blown over in the last big storm," remarked the strong-faced passenger calmly.

"Er-yes," replied the man with the watery blue eyes. "Well, this little girl of mine is the brightest—"

"On thing about that recent tariff session of congress," cut in the other man, "that pleased me is the fact that business kept going right ahead just as if nothing out of the ordinary was happening. They can muss around with the tariff all they've a mind to down at Washington, but people seem to be going right ahead turning out finished products and disposing of them at the old stand."

"Well, when she came down to the breakfast table this morning," pursued the parent of the phenomenal young one, "she looked at the buckwheat cakes on the table and—"

"Say, now you're talking," said the square-jawed man. "A lot of people quit eating buckwheat cakes when the warm weather comes along, but I eat 'em well into the summer. I'm crazy about buckwheat cakes. What kind do you have at your house—the old-fashioned buckwheat or the new-fangled self-raising kind?"

"Wh-uh-er, I don't know what kind my wife usually buys. Anyhow, as soon as my little girl saw the buckwheat cakes she—"

"Pretty hard to get anything as good as the old-fashioned things. Same way with maple syrup. The kind they have in the groceries may be on the level and all that, but give me the sort my uncle used to bring in to us from his farm when I was a kid. It'd be as thick as crude oil and with a flavor that was absolutely the best ever."

"That so?" weakly inquired the father of the extraordinary little girl.

"Well, she looked at those cakes solemnly for a minute, and then she looked first at her mother and then at me, and then she pointed at the cakes, and—"

"Speaking of pointing, I had a pointer dog die on me a week before last that I wouldn't have taken \$200 for. Just got him last fall, and he was as good a dog to take hunting as I ever saw. 'Just broke me all up when I found him dead.'"

"But see here," said the man with the weak eyes, "I wasn't saying anything about—"

"Well, here's where I get off," said the larger man. "Glad to've seen you. Take care of yourself." And he hurried to the front end of the car to alight.

"Any man," he growled, as he walked across the street, "who thinks he can bore me all the way downtown with tales of the scintillating brilliance of his offspring when I want to look over my morning paper has got to run up from behind when I'm not looking and bind and gag me, and even then he'd find me pretty hard to handle."

CLOSING OUT

500,000 rolls of fine wall paper at 34c per roll and up. Interior and exterior house paint, \$1.25 per gallon. Barn and roof paint, \$1.00 per gallon. Write for free samples of wall paper and colored card of [paints]. J. L. ASH, 39 Sixth street, San Francisco.

Educational Signs.

The municipal council of Paris aims to teach history by means of street names. Two of the signs already in place read "Rue Rivoli—French victory, 1797," "Avenue Victor Hugo—French poet and novelist, 1802-1885."

HERE IS RELIEF FOR WOMEN.
If you have pains in the back, urinary, bladder or kidney trouble, and want a certain pleasant relief, try Mother Gray's KIDNEY PILLS. It is a safe and never-failing remedy for all forms of kidney trouble. Sample, package, at Druggists or by mail 50 cents. Sample, package FREE. Address The Mother Gray Co., Le Roy, N. Y.

Sea-Weed Eating Nations.

China and Japan are pre-eminently the seaweed eating nations of the world. Among no other people are seaweeds so extensively eaten and relished as food.

SPOHN MEDICAL CO., Chemists and Bacteriologists, GOSHEN, IND., U. S. A.

Your Hair Contrary?

Is it inclined to run away? Don't punish it with a cruel brush and comb! Feed it, nourish it, save it with Ayer's Hair Vigor, new improved formula. Then your hair will remain at home, on your head, where it belongs. An elegant dressing. Keeps the scalp healthy. Does not change the color of the hair.

Formula with each bottle. Show it to your doctor. Ask him about it, then do as he says.

We certainly believe this, or we would not say so. Ayer's Hair Vigor, as now made from our new improved formula, is a great preparation for the hair and scalp. Stops falling hair. Cures dandruff. Promotes the growth of hair.

Made by the J. C. Ayer Co., Lowell, Mass.

MAKES WASHING EASY

ELECTRIC LAUNDRY COMPOUND
Washes Clothes Without Rubbing. Will not injure finest fabric. Saves Time, Labor and Clothes.

Washers ELECTRIC COMPOUND CO. 231 211 WILSON ST. LOS ANGELES, CAL.

MEXICAN MUSTANG LINIMENT

For SORE THROAT.

It penetrates quickly, removes all inflammation and reduces the swelling of the glands. To obtain best results saturate a linen bandage and bind about the throat a few hours or over night, repeating next day if a severe case.

25c, 50c, \$1 a bottle at Drug & Gen'l Stores.

Holiday Provisions.....

A Mention of Good Things to Eat

Why not think over the table supplies you'll need, and send us an order for them all at one time?

We can not only fill your order for groceries and provisions of all kinds—but we'll save you money on crockery, glassware, and the important things in which the good things must be served.

A large general merchandise store like this enjoys many advantages that are shared with its patrons. Buying in immense quantities and receiving merchandise by the carload, we are able to effect enormous savings, which are divided with those who trade here. Do you get your share?

If you cannot come to our store, send your orders by mail. Write for descriptions and quotations on anything you need. We guarantee all orders to be filled satisfactorily.

Farmers Union

Santa Clara Co's Greatest General Merchandise Store
San Jose Branch at Campbell

2nd Hand Motorcycles

We have a number of good machines, taken in on exchange for new models. Among them are Merkels, Indians, Harley Davisons, Excelsors, Racycles, Tourists, and others. These machines have all been carefully overhauled and put into first-class condition.

If you don't care to spend the money for a new motorcycle, get one of these for from \$40 up

We are now delivering 1912 FLANDERS motorcycles, and will have the NEW INDIANS by January 1.

TAXES 1911

OFFICE OF THE TAX COLLECTOR
COUNTY OF SANTA CLARA, CALIFORNIA

San Jose, California, October 5, 1911

Notice is hereby given that the taxes for the year 1911 will become due and payable October 9th.

First installment. Taxes on all personal property, a lien on or secured by land, all special taxes, and one-half of the taxes on all real property are delinquent on November 27, 1911, at 6 o'clock P. M., when 15 per cent. will be added to all of said first installment remaining unpaid.

Second installment. The remaining one-half of taxes on all real property will be due and payable January 2, 1912, and delinquent April 22, 1912, when 5 per cent. will be added to all taxes remaining unpaid.

Taxpayers may, if they desire to do so, pay the whole tax at one payment.

For the purpose of receiving taxes I will be in the several townships of the county as follows:

At the Bank of Campbell, in the town of Campbell, on Wednesday, October 18, 1911.

And at my office in the Hall of Justice Building, cor. St. James and Market streets, San Jose, Cal., daily, Sundays and Legal Holidays excepted, from 9 A. M. to 5 P. M., to and including Monday, November 27, 1911, and Monday, April 23, 1912 at 6 o'clock P. M.

The second installment of taxes is payable at my office in the Hall of Justice Building, San Jose.

WM. A. JANUARY, Jr.

Tax Collector of Santa Clara County

SUMMONS

In the Superior Court of the State of California, in and for the County of Santa Clara.

Ida Von Henn Burke, Plaintiff, vs. Leland Herbert Burke, Defendant.

Action Brought in the Superior Court of the State of California in and for the County of Santa Clara, and the Complaint filed in the office of the Clerk of said County of Santa Clara on the 20th day of October, 1911.

The People of the State of California solid greeting to Leland Herbert Burke, Defendant.

You are hereby directed to appear and answer the Complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara; within ten days after service on you of this summons, if served within this County, or within thirty days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint as arising upon contract, or will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 20th day of October, A. D. 1911.

HENRY A. PFISTER, Clerk.

L. D. ROHNETT, Attorney for Plaintiff.
